

CASE STUDY

Architectural & Commercial

Project Specs

Location: Healthcare Institution
Application: Healthcare Institution
Product: FRP Panels of Fibergrate® Flatsheet

Overview

Hospitals are compassionate providers of comprehensive, high quality, patient-focused healthcare services. Maintaining the aesthetics of these facilities is vital for creating a sanitary environment, and also for providing a bright, uplifting environment for patients. There are a number of factors that can make the maintenance of healthcare facilities a challenge.

Problem

The walls of hospitals are constantly being damaged by the ongoing movement of hospital equipment, such as gurneys, stretchers, and machinery. Healthcare facilities need a cost-effective way of protecting the walls to handle the day-to-day abuse that occurs.

Solution

Fibergrate offers the following benefits to the healthcare sector:

- Superior life cycle cost
- Impact resistance
- Fire retardant
- Custom colour to match the décor
- Low maintenance
- Light and easy to install

Fibergrate supplies thin FRP panels of Fibergrate flatsheet with an extra low flame spread rating. Fibergrate is able to work with hospitals on the repairs to come up with a solution that is durable, long-lasting, maintenance free, and cost-effective. Fibergrate flatsheets can be installed on the walls in lobbies, hallways, stairwells, elevators, and more.
